

Hadrien Cornier

Austin, Texas, United States | hadrien.cornier@gmail.com | linkedin.com/in/hadrien-cornier

SUMMARY

Engineering manager and hands-on ML and data engineer leading seven data, machine learning, and backend engineers. Owns backend data infrastructure and has built production systems for collection, enrichment, evaluation, serving, and workflow automation across three companies. Partners with the founder on product, commercial strategy, negotiation, and operations.

EXPERIENCE

Talroo | Austin, TX | Jul 2021 - Present

Engineering Manager Jan 2025 - Present | **Senior ML Engineer** Oct 2022 - Jan 2025 | **ML Engineer** Jul 2021 - Oct 2022

- Lead seven data, machine learning, and backend engineers while remaining hands-on in architecture, technical review, hiring, and delivery. Conducted about 300 software engineer interviews and built the hiring system.
- Own backend data systems for job ingestion, enrichment, analytics, application delivery, publisher pricing, and orchestration of ETL, training, inference, and production jobs. Built pipelines processing about one million jobs daily on a platform handling roughly 300 million raw event records daily.
- Led production ML across retrieval, ranking, forecasting, bidding, and applicant screening. Co-built a hybrid retrieval engine and redesigned the recommender, increasing revenue by approximately \$20M.
- Cut compute requirements sevenfold for ML systems serving roughly 20 million inference requests daily, saving \$1M annually. Ran hundreds of A/B tests to improve search.
- Built an AI knowledge base and internal MCP server connecting engineers to company data and operations. Automated feedback and reporting workflows and trained engineers and data scientists in agentic coding.
- Negotiated with Talroo's largest customer, doubling its spend. Improved sales targeting through churn and failed-client analysis, allocated about \$1M in monthly publisher spend, and owned \$5M in annual cloud and software contracts.

Augustus Intelligence | New York City | Apr 2020 - Jul 2021

ML Engineer

- Built backend and data pipelines for distributed retail camera sensors, plus the control plane for remote updates, monitoring, and automated processing. Contributed to computer-vision research for industrial anomaly detection.

Revelio Labs | New York City | Jun 2019 - Aug 2019

ML Intern

- Refactored web-scraping and enrichment pipelines, improving responsiveness and enabling SQL queries. Owned two production models for payroll estimation and resume valuation.

Gendarmerie Nationale | Ajaccio, Corsica | Sep 2015 - Apr 2016

Officer Cadet

EDUCATION

Columbia University | MS, Data Science, Statistics and Machine Learning | 2018 - 2019

École Polytechnique | MS, Computer Science and Applied Mathematics | 2015 - 2019

Harvard Law School Executive Education | Negotiation and Leadership | Mar 2026

Stanford University Executive Education | Accounting and Finance for the Non-Financial Executive | Jan 2027 (Upcoming)

SKILLS

Data Systems | Production ML | Testing and Experimentation | Workflow Automation and Agentic Coding | Engineering Management | Negotiation and Sales Operations | Product Judgment and Business Problem Solving
