Austin, Texas, United States — hadrien.cornier@gmail.com — [linkedin.com/in/hadrien-cornier](https://www.linkedin.com/in/hadrien-cornier)

Experience

Engineering Manager, Talroo, *Austin, TX*

Jan 2025 - Present

- Hire and lead a 7-person AI, data, and full-stack team. Completed and submitted 288 interview scorecards (January 2022–September 2026). Automated recruiting summaries and screening recommendations for human review. Named reviewer on 1,082 pull requests by 30 colleagues since 2021.
- Created the foundation for searchable company knowledge. Turned meeting actions into reviewable engineering proposals. Extended daily sales and engineering recaps.
- Reviewed sales sequences and designed research and follow-up workflows with sales and marketing.
- Took over publisher monitoring and feed setup in August 2025. Designed publisher controls, analytics, and onboarding. Advanced personalization adoption with publishers. Extended application APIs to preserve and deliver qualifying answers.
- Evaluated ATS integrations and Facebook acquisition with product and sales. Joined external partnership negotiations.
- Adapted Firstmate with review gates and privacy-aware routing. Trained engineers and support staff on AI-assisted work.

Senior ML Engineer, Talroo, *Austin, TX*

Oct 2022 - Jan 2025

Led R&D efforts redesigning core ML recommender system end-to-end, increasing revenue by approximately \$20M. Optimized the ML system, saving \$1M annually. Built Vespa search infrastructure and candidate-search models and pipelines. Added qualification-aware question selection. Built requirement extraction covering 100% of 3,673,416 live jobs (September 15, 2026).

ML Engineer, Talroo, *Austin, TX*

Jul 2021 - Oct 2022

Worked on the AI powering hundreds of job boards in the US. Moved ranking and text models to shared Triton serving. Delivered millions in savings. Merged inference strategies into a single system.

ML Engineer, Augustus Intelligence, *New York City*

Apr 2020 - Jul 2021

R&D for a Bayesian computer vision pipeline for visual industrial anomaly detection. Engineered full redesign for the control system of a network of thousands of sensors.

ML Intern, Revelio Labs, *New York City*

Jun 2019 - Aug 2019

Designed and deployed 2 production models for company payroll estimation and resume valuation, owning the models end-to-end.

Summer Research Intern, Atos, *Les Clayes-sous-Bois, France*

Apr 2017 - Sep 2017

Wrote a Haskell transpiler of Quipper into aQasm for the quantum computing team working on the Atos Quantum Learning Machine (Atos QLM), a quantum computer simulator.

Officer Cadet, Gendarmerie Nationale, *Ajaccio, Corsica*

Sep 2015 - Apr 2016

Assisted the regional commander with a report on organized crime.

Education

Harvard Law School Executive Education, *Cambridge, MA*

March 2026

Negotiation and Leadership

Columbia University, *New York City*

2018 - 2019

Master of Science - MS, Data Science, Statistics, Machine Learning

École Polytechnique, *Palaiseau, France*

2015 - 2019

Master of Science - MS, Computer Science and Applied Mathematics

#1 French engineering school, ranked 34th at the entrance exam

Collège Stanislas Paris, *Paris, France*

2013 - 2015

Top Classes préparatoires scientifique in France (MPSI - PSI*), Mathematics, Physics, Computer Science

Intensive preparation for the highly competitive entrance exams to the grandes écoles

Collège Stanislas Paris, *Paris, France*

2008 - 2013

Scientific Baccalauréat - Option Mathematics

In senior year, spent 8 months in a team of 6 preparing for the French submission to the International Physicist Tournament.

Skills

Engineering Management, Machine Learning, Python, Spark, Data Engineering, Distributed Systems, AI-Assisted Engineering, Business Automation, Product Design, Programmatic Advertising, Sales Operations, Publisher Partnerships, Negotiation
